

Dear Friends,

We wish that you keep fine and enjoy good health.

We are doing well and everything is fine at our end. The fear of Corona is growing up. The Prime Minister has called us to remain inside the house. Yesterday we have a special day. We are called on to remain within the house from morning 7 o'clock to evening 9 o'clock. The disease is in second stage and expected to move to third stage in the next week. possibly it can affect more people. Today 280 people are infected we have 5 death. The situation is slowly becoming bad and it can be worse when it is not attended carefully.

Prema visited the villages and met the adopt children. The adopt children and their families are doing well. The children are on holidays as schools are closed. Only those children who write their public exam attend to school to write their exams. The children expressed that it is very difficult for them to remain inside the house. They want to go out and play and be happy. Prema has advised them to take care and keep their hands clean always.

Prema also informed them about the spread of Corona in the Netherlands. The children were sad to know that many people are affected in the Netherlands. The children conveyed their greetings and love to you and to all adopt parents. Prema met the children in smaller groups and taken pictures of them. We are happy to share the pictures to you.

We request you to advise the adopt parents not to send parcel during this difficult time. We are informed that the parcels maybe carry Corona Virus. We have warning from postal department. So kindly inform the adopt parents not to send parcel for a while.

We wish you to take good care and be safe.
with warm regards,

Antoni and Prema.
